Bloomberg Commodity Index	45.61	3.90	2.40	-4.44	45.61	3.90	2.40	-4.44	—	—	—
Real Asset Blended Index	30.76	7.27	5.35	4.48	30.76	7.27	5.35	4.48	—	—	—

Performance shown represents past performance and cannot guarantee future results.

Current performance may be lower or higher than that shown. Investment return and principal value will fluctuate. Shares, when redeemed, may be worth more or less than their original cost. Class A shares have a maximum front-end sales charge of 5.50%. Total returns assume the reinvestment of all distributions at net asset value and the deduction of all expenses. Performance would have been lower if fees had not been waived in various periods. Performance data current to the most recent month-end is available at www.wilmingtonfunds.com.

¹The fund's advisor, distributor and shareholder services provider have agreed to waive their fees and/or reimburse expenses so that the total annual fund operating expenses paid by the fund's Class A Shares and Class I Shares will not exceed 0.96% and 0.71%, respectively, not including the effects of acquired fund fees and expenses, taxes or other extraordinary expenses. This waiver may be amended or withdrawn after January 31, 2022, or with the agreement of the fund's Board of Trustees. Please see the prospectus for more information on fees, expenses, and expense limitation arrangements, if any.

Symbols/CUSIPs

Class A	WMMRX	97181C449
Class I	WMRIX	97181C431

Investment objective

Long-term preservation of capital with current income

Investment approach

The Fund invests primarily in a portfolio of inflation-protected debt securities, real estate-related securities and commodity/natural resource-related securities. The Fund is designed to protect against the long-term effects of inflation on an investment portfolio and employs multiple investment advisors who specialize in the management of various real assets.

Features of real assets

- Historically low correlation with other asset classes
- Potential to reduce overall portfolio volatility
- Potential to hedge against unexpected increases in inflation

Performance shown represents past performance and cannot guarantee future results.

Current performance may be lower or higher than that shown. Investment return and principal value will fluctuate. Shares, when redeemed, may be worth more or less than their original cost. If sales charges were included, performance shown would be lower.

You should consider a fund's investment objectives, risks, charges, and expenses carefully before you invest. Information about these and other considerations is contained in the fund's prospectus, which is available on our website, www.wilmingtonfunds.com. Please read the prospectus carefully before investing.

Important Information And Risk Disclosure

All investments involve risk, including possible loss of principal. Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments. Bond prices are sensitive to changes in interest rates, and a rise in interest rates can cause a decline in their prices. Real estate is a cyclical industry that is sensitive to interest rates, economic conditions (both nationally and locally), property tax rates and other factors. Commodity-related securities may be subject to additional risks and broad price fluctuations. High yield securities present greater risk of loss than higher quality debt securities and may be subject to greater price volatility. Investments such as mutual funds that focus on alternative strategies are subject to increased risk and loss of principal and are not suitable for all investors. Diversification and asset allocation do not assure profit or protect against loss. Investment markets are volatile and no investment strategy can guarantee that the desired result will be achieved.

Turnover is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a year. There is no assurance that the fund will maintain its current level of turnover. **Alpha** is a measure of performance on a risk-adjusted basis. The excess return of the fund relative to the return of the benchmark index is a fund's alpha. **Beta** is a measure of a portfolio's volatility, or systematic risk, in comparison to the market as a whole. A beta below 1 indicates less volatility than the market; a higher beta indicates more volatility. **R-squared** measures how closely a fund's performance correlates with that of its benchmark, thus representing how much of the fund's performance can be explained by the overall market or index. 1 indicates perfect correlation; 0 indicates no correlation. **Sharpe ratio** refers to a risk-adjusted measure calculated using standard deviation and excess returns to determine reward per unit of risk. The higher the ratio, the greater the risk-adjusted performance. **Standard deviation** indicates the percentage by which a portfolio's performance has varied from its average performance in any given month during the period indicated. The higher the standard deviation, the greater the range of performance, indicating greater volatility.

The Fund's primary benchmark is the S&P Developed Property Index and the Bloomberg Barclays U.S. Treasury Inflation Protected Securities (TIPS) Index is the secondary

benchmark. The **S&P Developed Property Index** defines and measures the investable universe of publicly traded property companies in developed markets. The **Bloomberg Barclays U.S. Treasury Inflation Protected Securities (TIPS) Index** measures the performance of the US Treasury Inflation Protected Securities ("TIPS") market, and the index includes TIPS with one or more years remaining to maturity with total outstanding size of \$250 million or more. The **Real Asset Blended Index** is calculated by the investment advisor and is currently based on a weighting of the following indices: 37.5% S&P Developed Property Index, 37.5% Bloomberg Commodity Index (Total Return); and 25.0% Bloomberg Barclays U.S. Treasury Inflation Protected Securities (TIPS) Index. Prior to January 1, 2020, it consisted of: 60% S&P Developed Property Index, 20% Bloomberg Barclays U.S. Treasury Inflation Protected Securities (TIPS) Index, and 20% Bloomberg Commodity Index (Total Return). The **Bloomberg Commodity Index** represents a broad diversified group of commodities and relies primarily on liquidity data, along with dollar adjusted production data, in determining the relative weightings.
